

# Make Your Own Quizzler Quiz

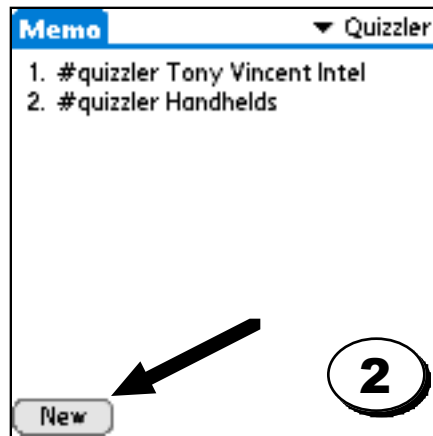

To make a Quizzler quiz, you'll first follow the special format to write your questions in *Memos*. Then launch *Quizzler* and import the memo. Here's how:

## Write Your Questions

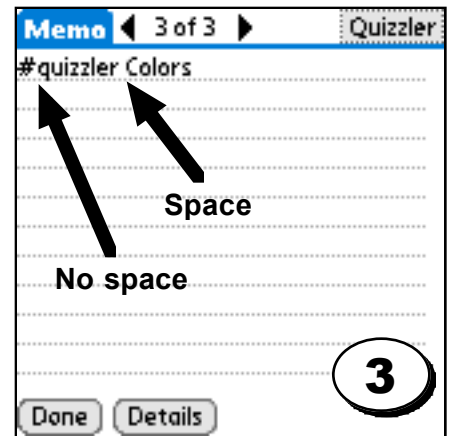

1

Launch **Memos** (sometimes called **Memo Pad**).

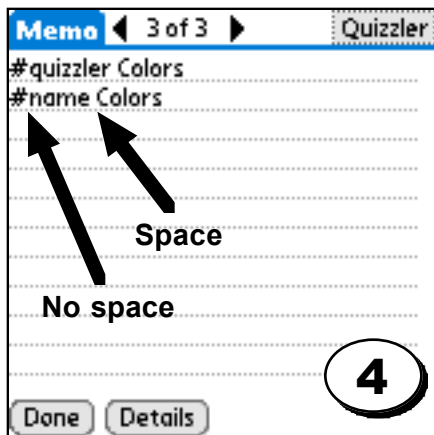

2

Tap the **New** button.

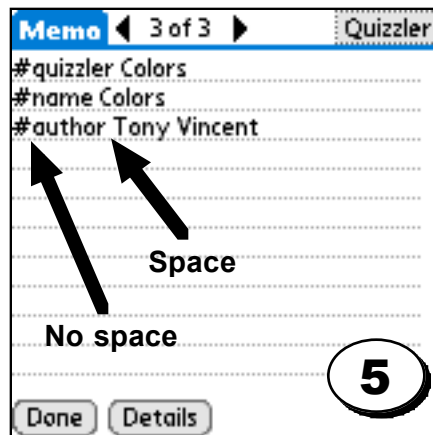

3

Enter **#quizzler**, enter a space, and give your quiz a name.

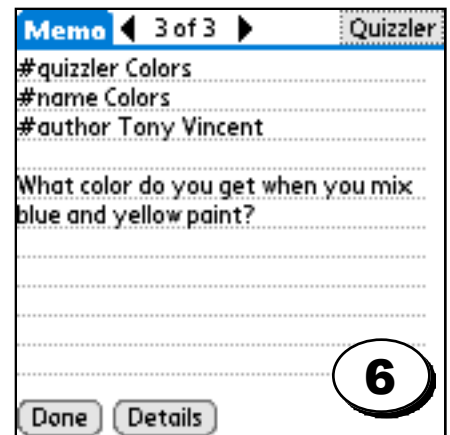

4

Return to the next line and enter **#name**. Enter a space and the name of your quiz again. (It seems strange that you type the name twice, but that's how it's done!)

5

Return to the next line and enter **#author**. Type a space and your name. This gives you credit for your hard work!

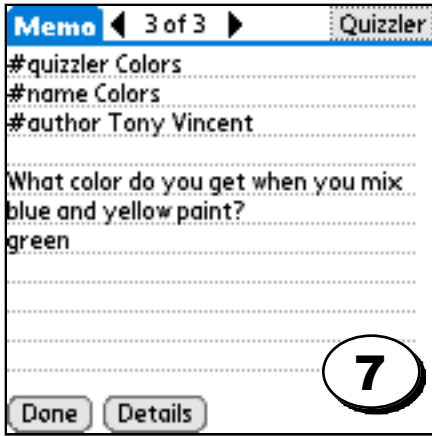

6

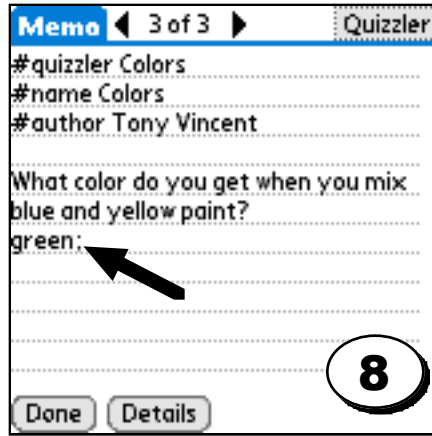

Return twice and enter your first question.

Don't include semicolons in your questions! Also, let your questions automatically wrap to the next line, don't enter a return in your question!

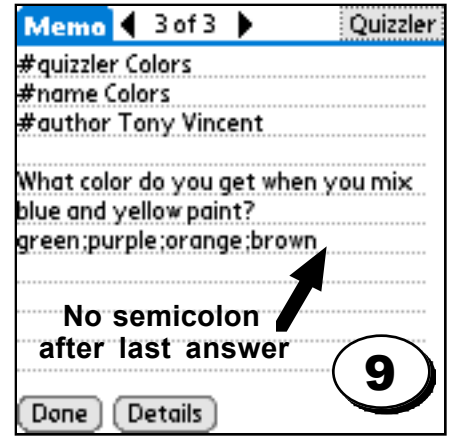

Follow these directions *exactly!*  
Don't type a space after the # signs, or your quiz won't work!

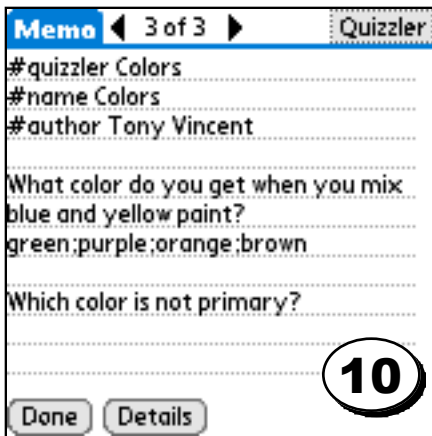

Return to the next line and enter the correct answer to your question.

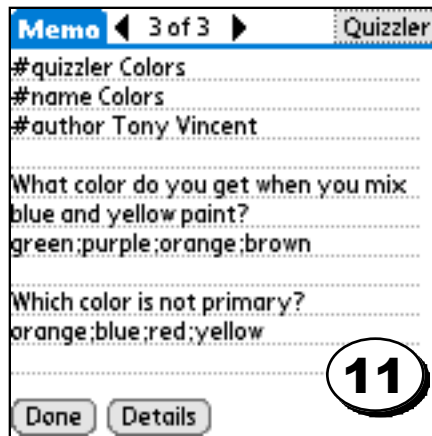

Enter a semicolon. Don't type any spaces before or after the semicolon.

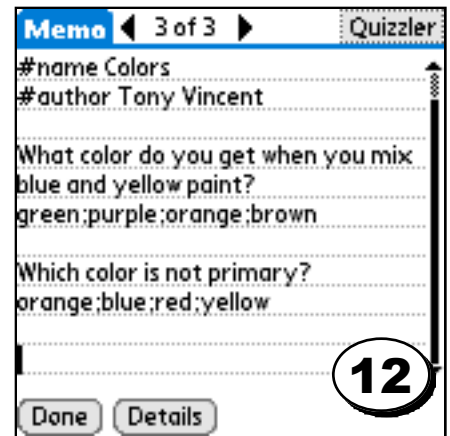

Enter up to five wrong answers, separated with semicolons. Again, don't enter spaces before or after the semicolons.

Return twice and enter your second question.

Return to the next line and enter the correct answer followed by wrong answers, separated with semicolons.

Return twice and continue to enter questions, just like in steps 6-10.

When finished entering questions, tap **Done** and the **Home** button. Next, it's time to import the questions into Quizzler!

You can download the latest version of Quizzler and free quizzes from [pocketmobility.com](http://pocketmobility.com).

Go to [www.quizzlerpro.com/support/quizzlerformat.html](http://www.quizzlerpro.com/support/quizzlerformat.html) for more tags and features that you can add to your quiz!

Enter as many questions as you like. However, some versions of **Memo Pad** have a limit of 4,000 characters, which is enough for about 20 questions.

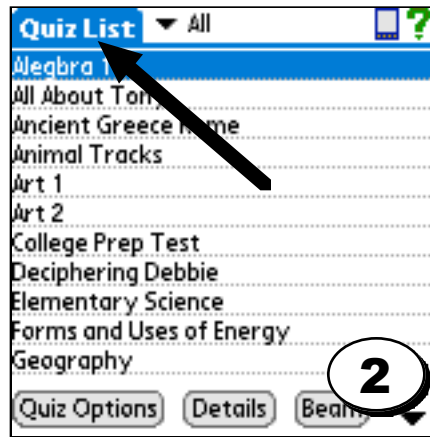

Your quiz will not work properly if you do not follow the format *exactly*.

# Import Your Memo

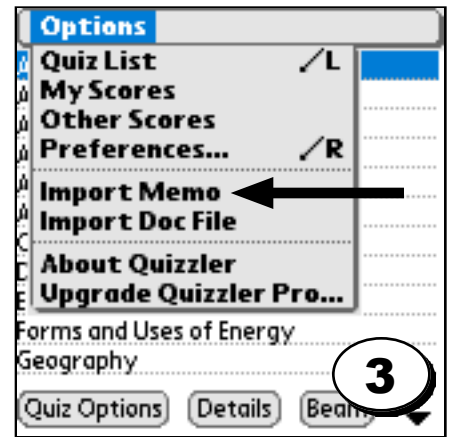

1

Launch **Quizzler**.

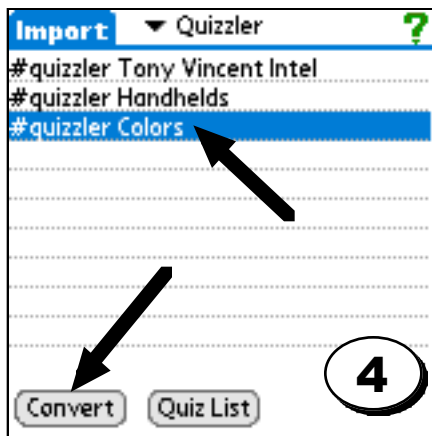

2

From the Quiz List, tap the top left of the screen for the menu.

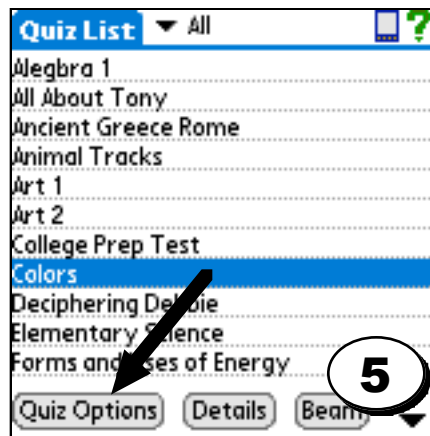

3

Tap **Import Memo**.

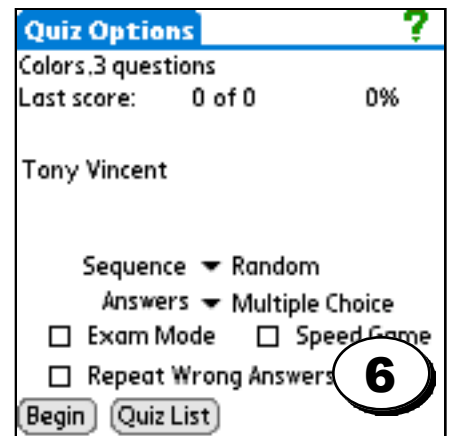

4

Find and select the memo with your questions and tap the **Convert** button.

5

Your new quiz is now available in your Quiz List! Tap **Quiz Options**.

6

Set your options and tap **Begin** to start your quiz!

Don't delete your original Memo document with your questions. You may want to edit, add, or delete the questions later.

To edit your quiz, make changes in the original Memo, and then follow steps 1-3 again and choose to replace the quiz.

If your quiz doesn't work or displays questions incorrectly, your Memo document doesn't follow the format precisely. Go back and check it over.

For more information about creating quizzes with additional features, see the Quizzler documentation from [pocketmobility.com](http://pocketmobility.com).
